

Classic style Modern connectivity

Hegel H70 Entry-Level integrated amplifier with analog and digital inputs

An amplifier designed in the appropriate millennium! The H70 delivers spectacular sound quality at price levels never seen before from Hegel. Connecting new and old - maximizing quality from both analog and digital sources. H70 is the amplifier of 2010!

Digital-inputs

The H70 includes both coaxial, optical and USB-inputs (coaxial, optical is hard switched), as well as RCA and XLR analog connections.

Full HD resolution

The H70 supports full High Definition Audio with a resolution of 24bits / 192kHz on the coaxial and optical inputs. (File size approx. 10 times that of a regular CD).

Hegel Next Generation sound

H70 is part of the Hegel Next-Gen products. The new technology gives you a much more rhythmic sound with a deeper and tighter bass. It also provides a higher level of detail while still maintaining smoothness and musicality.

Environmentally friendly

The patented SoundEngine technology found in the H70 not only reduce distortion. It also reduce the H70's power consumption in idle by close to 70 %. This is good your economy and good for the environment.

New HEGEL H70 Amplifier

The entry level Hegel product offers a unique combination of power, finesse and versatility. More so than any competitor on the market. Using the latest version of Hegel renowned SoundEngine amplifier modules it delivers immense power and rhythm. At the same time the low distortion levels ensure that all the details and splendor in the music is brought forward in a natural and pleasant way.

The H70 is the first integrated Hegel amplifier with a fully balanced pre amplifier stage. This reduce distortion to an all time low.

In addition to high quality RCA and XLR analog inputs, the H70 also have digital inputs . There are two digital inputs, optical and coaxial, that can be used to upgrade the sound quality from most digital sources like music streamers, satellite receivers and so on. The built in USB soundcard also allows you to easily connect a computer with very high levels of performance. Even laptops can now be used as sources without disturbing background noise.

H70 is a Hegel Next-Gen product, meaning we have implemented the new Hegel FET-technology. Next-Gen products has far less higher order harmonic distortion, bringing you closer to the music and the sound intended by the studio. The sound is more detailed, while still being more pleasant and warm / natural sounding than it's predecessors.

It comes with the RC3 system remote control unit. The RC3 can control most functions on the H70 as well as other Hegel components.

Digital inputs	:	1*coax, 1*optical (hard switch) and 1*USB
Analogu inputs	:	3*RCA unbalanced and 1*XLR Balanced input
Output Power	:	70+70W in 8 ohms
Frequency response	:	1 Hz - 100.000 Hz
Damping Factor	:	More than 1000
Dimensions/Weight	:	8cm x 43cm x 41,5cm (HxWxD), 12kg
